

Be the Sentence

Skills: Print Structure (Words and Sentences)

Materials: 8 x 11 word card for each student

Procedure:

Physical involvement and hands-on activities are great for increasing learning in young children. One activity to support concept of word learning is to have each student physically represent a word in a sentence that the teacher creates.

Create single-page size cards for each student, with one word on each card (for example "We" "went" "to" "the" "store"). Students work together to arrange themselves into the proper order to form a sentence.
